Grid Garden

cssgridgarden.com

CSS Grid Garden is an interactive game that helps you learn and master CSS Grid. Through fun CSS challenges, you can practice placing items on the grid by writing CSS code, making it an enjoyable way to improve your skills.

GRID GARDEN

Level 1 of 28

Welcome to Grid Garden, where you write CSS code to grow your carrot garden! Water only the areas that have carrots by using the `grid-column-start` property.

For example, `grid-column-start: 3;` will water the area starting at the 3rd vertical grid line, which is another way of saying the 3rd vertical border from the left in the grid. 

```
1 #garden {  
2   display: grid;  
3   grid-template-columns: 20% 20% 20% 20% 20%;  
4   grid-template-rows: 20% 20% 20% 20% 20%;  
5 }  
6  
7 #water {  
8    grid-column-start: 3;  
9 }  
10  
11  
12  
13  
14
```

CSS Selectors Cheatsheet

frontend30.com/css-selectors-cheatsheet

CSS Selectors Cheatsheet is a comprehensive guide that covers various CSS selectors, from basic to advanced. It's a handy resource for quickly referencing and mastering different selector types to style web elements effectively.

The screenshot shows a web-based application window titled "CSS selectors cheatsheet". The interface includes a sidebar with icons for file operations like Open, Save, and Close. The main content area displays four examples of CSS selectors:

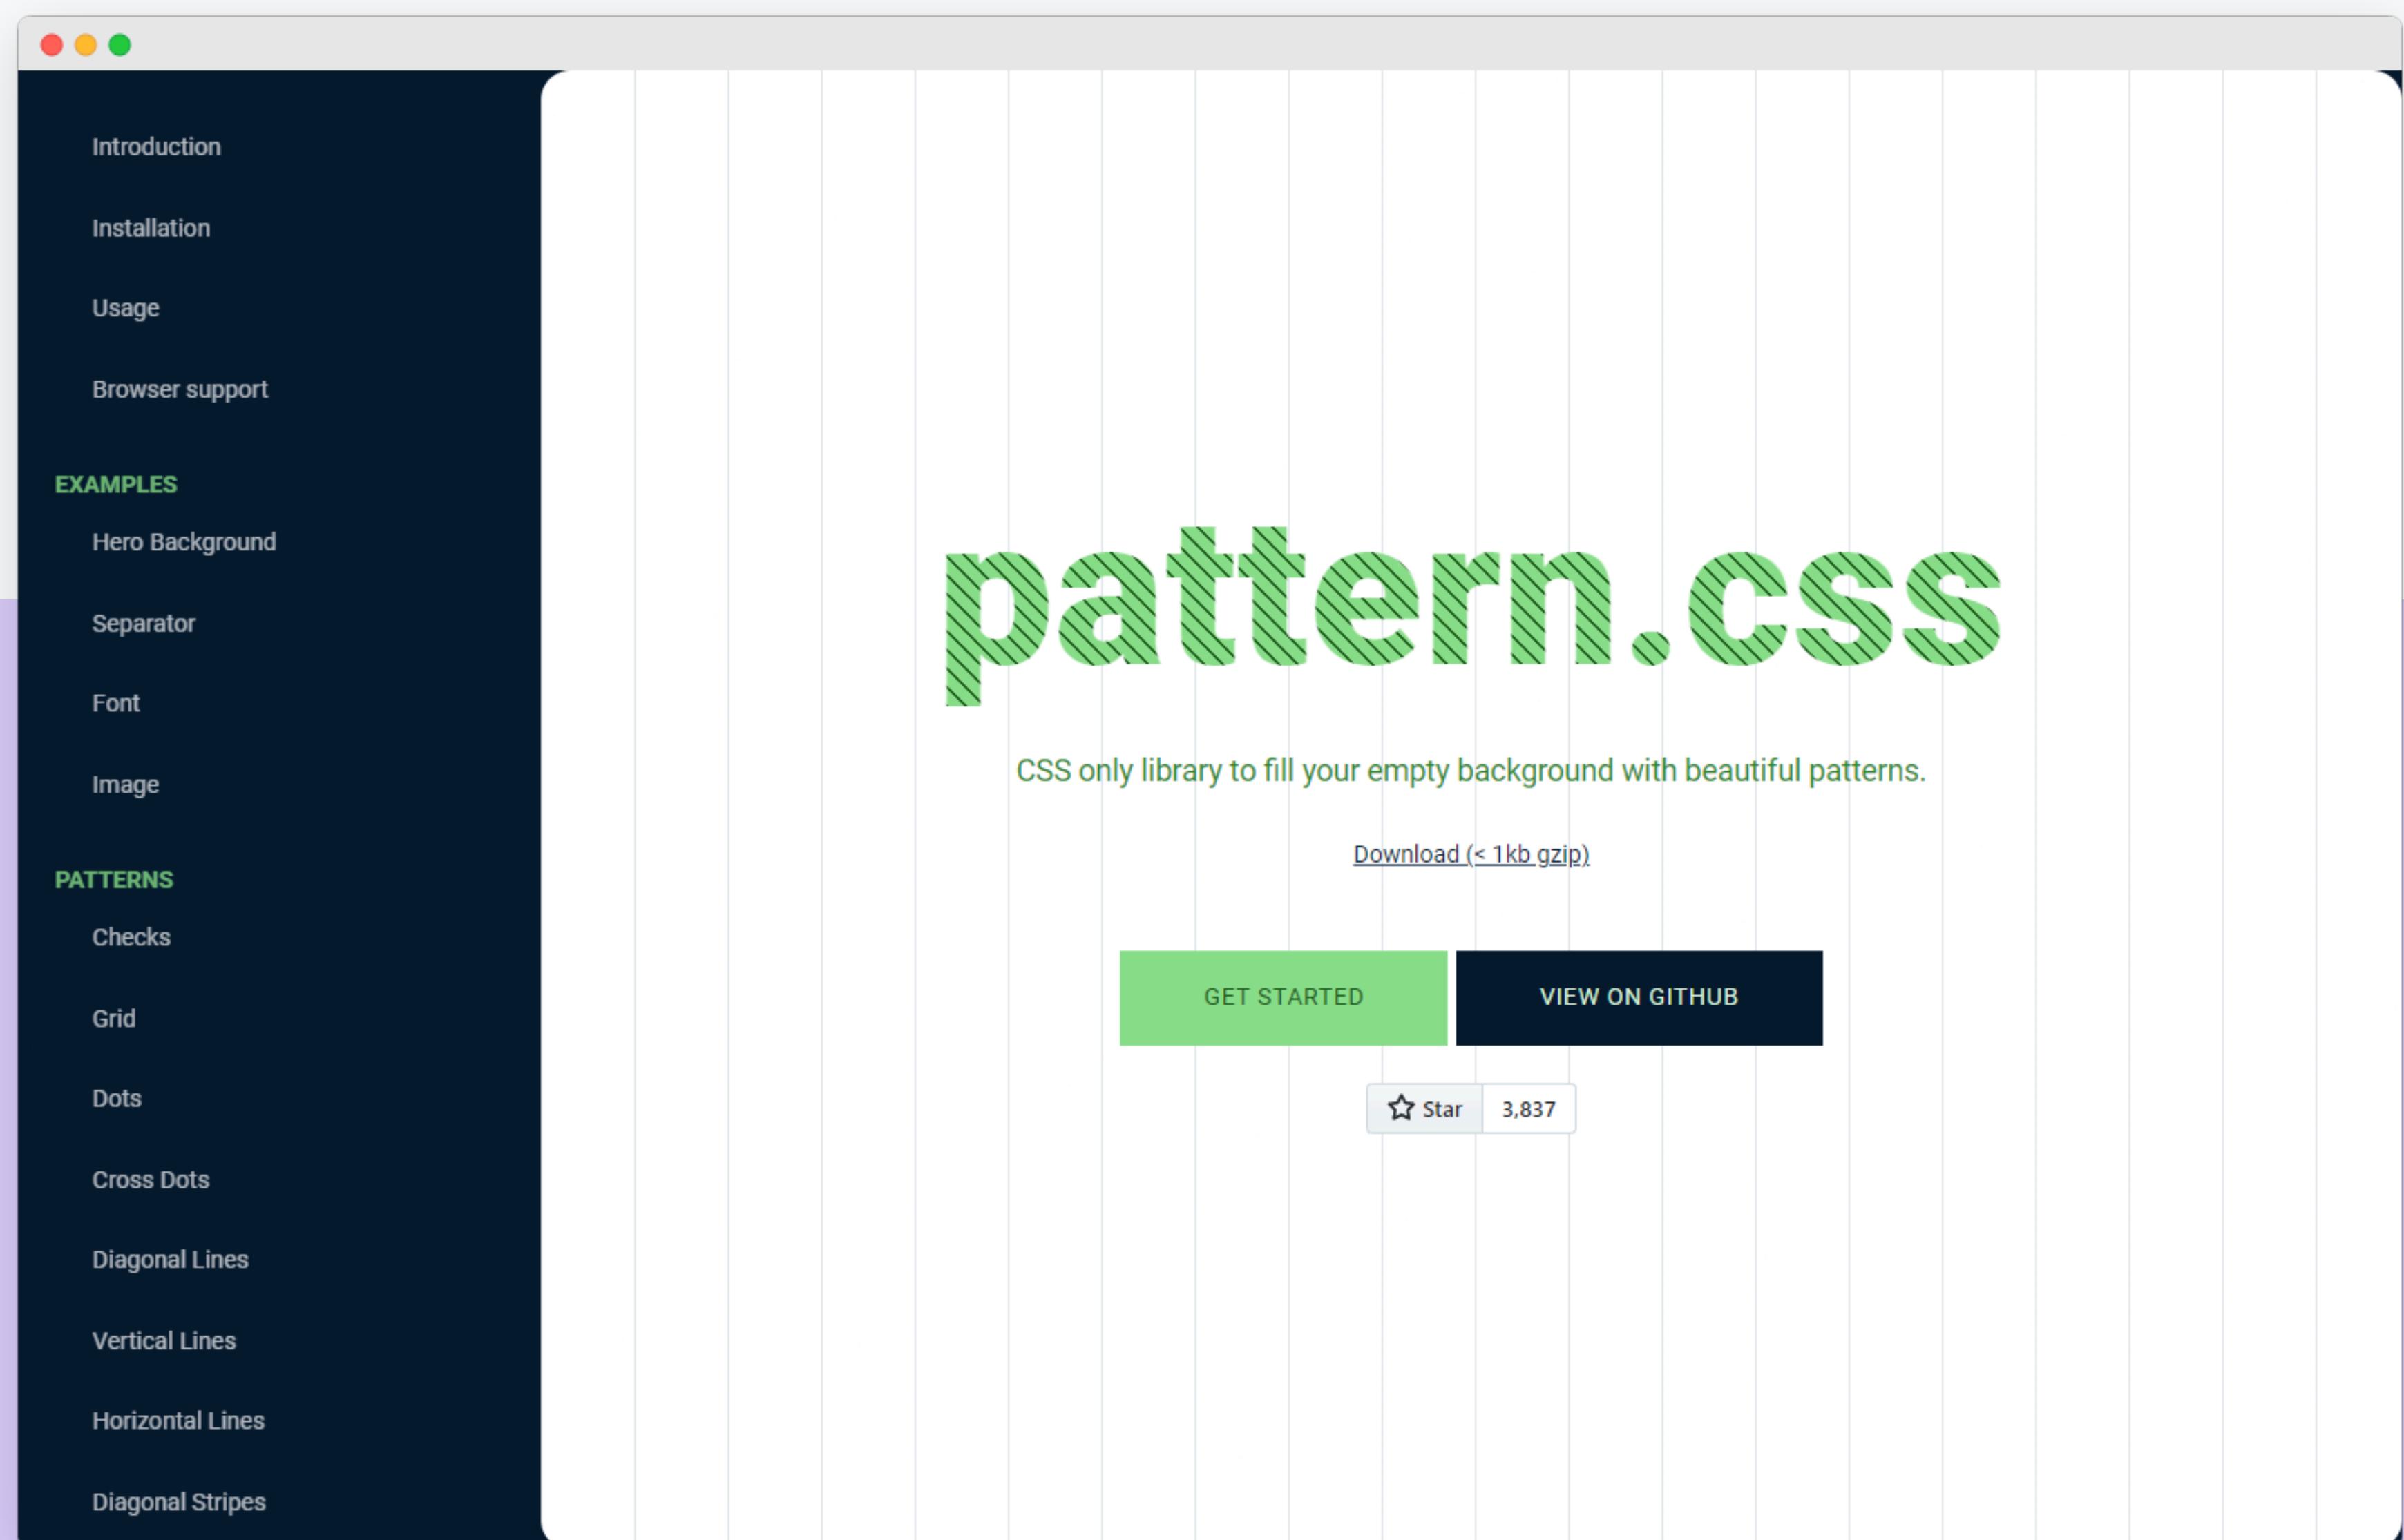

- Type Selector:** `a { }`
Three circular buttons labeled "a", "b", and "c" are shown, where "a" is highlighted.
- ID Selector:** `#a { }`
Three circular buttons labeled "#a", "#b", and "#c" are shown, all unselected.
- Child Selector:** `a > b { }`
A hierarchical tree diagram showing an "a" node with two children, "b" and "c", each with two children, "a" and "b". The first "a" under "b" is highlighted.
- Descendant Selector:** `a b { }`

At the top right, there are "game" and "answers" buttons. Below the content area, there is footer text: "Designed & built by nana" and "Collaborated with Ryan Yu".

Pattern CSS

bansal.io/pattern-css

Pattern.css is a lightweight library for creating beautiful, repeating patterns using only CSS. It provides a variety of customizable, easy-to-use patterns that can be applied to backgrounds, adding a unique touch to your websites.

Wait! Animate

waitanimate.wstone.uk

Wait! Animate is an online tool for creating CSS animations with ease. It allows you to design, customize, and preview animations, then generate the CSS code for your projects, making the animation process simple.

The screenshot shows the **WAIT! ANIMATE** interface. At the top, it explains that CSS lacks a property to pause an animation before it loops, and that `animation-delay` only delays the start. It highlights that **WAIT! ANIMATE** calculates updated keyframe percentages given a *wait* time using pure CSS.

Class Name: waitAnimate

Wait Time: 1 Second

Animation Duration: 2 Seconds

Timing Function: linear (selected), ease, ease-in, ease-out, ease-in-out

Transform Origin X: 50

Transform Origin Y: 50

Calculated Keyframes:

```
/*
Generated by
waitanimate.wstone.uk
*/
.waitAnimate {
    animation: waitAnimate_544336509 3s linear infinite;
    transform-origin: 50% 50%;
}

@keyframes waitAnimate_544336509 {
    0% {
        transform: perspective(100px)rotate(0deg);
    }
    16.667% {
        transform: perspective(100px)rotateX(180deg)rotateY(0);
    }
    33.333% {
        transform: perspective(100px)rotateX(180deg)rotateY(180deg);
    }
    50% {
        transform: perspective(100px)rotateX(0)rotateY(180deg);
    }
    66.667% {
        transform: perspective(100px)rotateX(180deg)rotateY(0);
    }
    83.333% {
        transform: perspective(100px)rotate(0deg);
    }
    100% {
        transform: perspective(100px)rotateX(180deg)rotateY(0);
    }
}
```

100 Days CSS

100dayscss.com

100 Days CSS is a challenge-based platform where you can improve your CSS skills by creating a new design every day for 100 days. It offers a series of creative tasks that help you practice and master CSS.

The screenshot shows the 100 Days CSS challenge interface. At the top, there are navigation links: "The Challenge" (underlined), "What is this?", "How can I join?", and "Leaderboard". On the right, there is a purple button labeled "Check Your Progress" with a bar chart icon. Below the navigation, the text "100 DAYS CSS CHALLENGE" is displayed. The main title "Day #11" is prominently shown. A challenge description follows: "Walking Boots: These boots are made for walking. Where are they going and for how long?". Below this, a note says "Grab the > TEMPLATE and submit your work." with a blue arrow icon. There is a text input field for "Paste your Pen URL here" and a blue "Submit" button. A timestamp "12:23:13" is shown next to a clock icon. To the right, there is a large image of two red walking boots. Below the image, there are navigation arrows for "Switch Day" and icons for "Share" and "Edit". At the bottom, there is a section titled "SUBMITTED PENS" with a small blue circular icon.

These free online **CSS tools** are perfect for leveling up your web development skills and making your design process more efficient.

Whether you're learning new techniques, creating animations, or experimenting with layouts, these resources provide the boost you need.

Try them out and see how they can transform your workflow!
